

# Take your open source career further

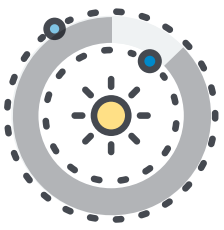

It's not rocket science, here's how...

The simple fact is that there's a global shortage of Linux professionals. There is high demand and rewards – not to mention a wealth of exciting opportunities – for those who get themselves certified with LPI. Even the sky isn't the limit if you've got open source skills.

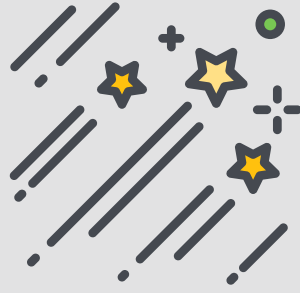

Open source technology is used extensively in SpaceX, the ISS and U.S. Air traffic Control.

90%

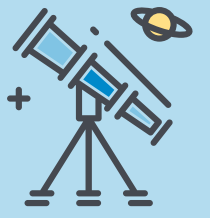

of employers say IT-certified staff are more likely to be promoted.

LPI-certification boosts pay and bonuses by 20-33% a year.

87%

of employers say it's hard to find open source talent.

44%

of Hiring Managers are hiking salaries to attract open source talent.

Most film studios run Linux for animation and special effects.

96%

of employers use IT certification as a hiring criteria.

You don't need a driver's licence for the Mars Rover. You need to be a Linux professional.

LPI has delivered >500,000 exams, in over 180 countries.

30%

of IT pros get a pay rise upon certification.
